

How to open a club meet to members with a 'Secondary Club Membership' in Swim Central

When setting up Club meets that members with secondary club memberships are eligible to enter, you must access your event in Swim Central, and go to:

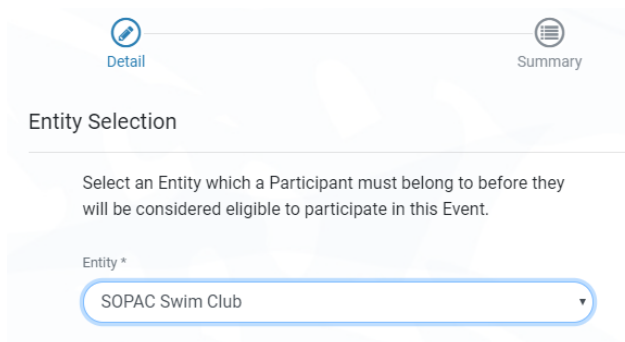

Event Requirements- Relationships

Your club will need to include *Relationship Requirements* if you wish for secondary membership members to be able to enter your meet. You must include any clubs that your secondary club members are from.

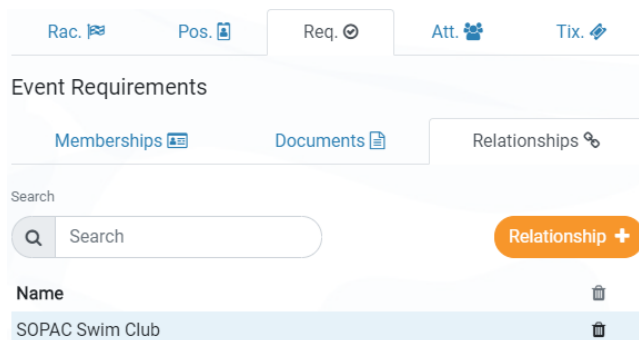

Click *Relationship +*

Select the Entity (club/s) that your secondary club members are from, from the drop-down list. You will need to do this multiple times if there is more than one club.

Any clubs that you have selected a relationship for will now appear on the list.

Please note this will limit swimmers from any other clubs that aren't listed (other than the host club) from entering.
